

A GREEN COMPANY

is looking for a m/f

PROCESS ENGINEER

Reference EC805

THE COMPANY

Based in the center of Walloon Brabant, our client is a green company that turns recycled or natural wood in clean syngas for power, gas or in the future, green hydrogen production.

We are currently searching for a PROCESS ENGINEER to join our office located in Louvain-La-Neuve. Due to its actual growth, the company is actively searching for an Process Engineer.

THE POSITION

The PROCESS ENGINEER is part of the Engineering department and manages all process engineering related topics of the projects. The Process Engineer is responsible for designing and defining gasification processes and gas processing. The engineering department supports the product development team, the operating sites and the commercial department by delivering technical expertise and provide solutions to reach turnkey configuration solutions.

The process engineer supports the department in the development of both innovative and commercial solutions. He/She will be able to improve industrial processes in order to maintain efficiency, reduce cost, improve sustainability and maximize profitability.

More details on demand.
